

Stapler nailer J-29

Manual stapler J-29, professional stapler With metal housing, underloading mechanism, distance stop, impact force adjustment

- The professional stapler makes it easy to change from a fine Wire clamp to a flat Wire clamp simply by means of a sliding mechanism.
- Quick loading system: For particularly easy filling, the stapler is equipped With an underloading mechanism and a safety release
- Manual stapler With power control: Adjust the stapler for softWood or
- hardWood using the power control feature.
- Precise-Plus: For precise Work in hard-to-reach areas and parallel stapling in a row of staples, the manual stapler has a long nose and a distance stop

The Novus Stapler handles A type 53 fine Wire staples as Well as D type

- 53F flat Wire staples from 6 to 14mm and E type J nails from 16mm; in addition, H type 37 and G type 11 hammer tacker staples can also be used
